Android Introduction 2.3.13 Electronic Signature Support

Purpose

With Liquid UI for Android, you can not only review transactions like Change Sales Order or Change Purchase Order but also sign the documents. Using our electronic handwritten signature feature, you can securely access and add your signature to the documents right from your SAP transactions, and ensures that the signatory of a digital document can be identified unambiguously. It makes the whole review process easy and efficient by eliminating all the paper and administrative hassles. Thus, improving your process efficiency by adding signature support right within SAP. Here is the list of benefits, that Electronic Signature Support provides to SAP users.

- Enhanced security
- Paperless workflow
- Improve user convenience
- Privacy concerns addressed
- Easy to apply Digital Signature
- Way better experience for your clients

User Interface

In this article, you will learn how to use the electronic signature feature in the Change Maintenance Order screen (IW32) and attach the signature file to a particular transaction.

1. Navigate to the Change Maintenance Order screen (IW32), and enter Order number 810800, as shown below:

2. Click on the attachment symbol located at the top of the screen. Then, a popup appears with the options Attachment list, Store business document, and Create Attachment, as shown below.
