### Android Usability 6.04.08 Table Control

Liquid UI for Android not only displays all the table controls as you see in SAP GUI but also gives you the best user experience while working on it. It supports the latest features, such as voice-to-text, assists popup windows, tab key functionalities, etc. to navigate between table cells and enter values.

Let's, learn in detail how to use the following features and functionalities supported in Table Control.

- 1. Tab Key functionality
- 2. Swipe to scroll functionality
- 3. <u>F4 and Scan functionality</u>
- 4. Voice to Text
- 5. <u>UI Assist popup</u>

Initially, navigate to an SAP transaction screen where the table control exists. Here, we are on the Change Sales Order: Overview screen, where the **All items table** exits, as shown below:

(c) 2024 Liquid UI | Synactive | GuiXT <dev@guixt.com> | 2024-07-31 17:04 URL: https://www.guixt.com/knowledge\_base/content/114/1329/en/60408-table-control.html

#### Tab Key functionality

When you place the cursor on any table cell, a keyboard appears on the screen with the **Tab Keys** on top of it, which helps you to navigate between cells, as shown below:

To learn more about the tab key functionality, <u>click here.</u>

#### **UI Assist popup**

Liquid UI facilitates entering values inside the table via a series of Input Fields using the assist popup window, as shown below. With this, the table's values can be entered easily and quickly, thereby simplifying the data entry process.
