

Designer Features

5.03.02 Creating an SAP Customization Script (*.sjs) in Designer

Creating a Script

To create a new script, please do the following.

1. Launch Designer..
2. A blank script window will appear as shown below.

3. Begin entering your code directly in the editor window.
4. When you are finished editing, click the Save icon shown below or choose the Save or Save As from the File menu.

5. The new script file will be saved in the location specified in your configuration file.

Designer Features

Note: Script files cannot be saved in the trial version of Designer. To save scripts, you must have a valid license both for GuiXT and for Designer.
