Getting Started with iOS 1.07 What is Liquid UI for iOS and how can I buy it?

Liquid UI for iOS reimagines SAP GUI. Built with touch and mobility in mind, Liquid UI provides the same SAP native screens on your iOS devices that you would find on the SAP GUI desktop.

Furthermore, you can simplify transactions by aggregating multiple screens, tabs, and transactions; converting input fields into single-press graphical buttons; table controls; camera integration for barcode scanning; email for SAP workflow integration; and native support for sleds, all while leveraging gestures such as flicks, swipes, and zoom.

You can acquire a license for our product using one of the following three options:

- In-app purchase through the App Store which gives you a **Client License**.
- Subscription-based, purchases through the Portal License Manager provide you with an **Enterprise License**.
- Purchase through Liquid UI Sales, recommended for bulk licenses at discounted prices.

Learn more about <u>client and enterprise licenses</u>.

Note: The Liquid UI for iOS must be installed with a valid license. Without a license, it only functions on a few screens (typically 1-5 screens).

To purchase a license through the App Store, please do the following:
