

Getting Started with iOS

1.09 What are different Liquid UI for iOS pricing models?

Liquid UI for iOS offers users different pricing models, providing flexibility in purchasing options tailored to individual needs. This article guides you through the various pricing models available and their features.

To learn about Liquid UI for iOS subscription models, [click here](#).

How does the Liquid UI for iOS subscriptions work?

You can get a yearly subscription (365 days) through an In-app purchase. By default, subscriptions would be renewed automatically unless canceled by the user.

Note: Purchasing the license through LAMP is recommended for more flexible buying options.

How do I choose a pricing model?

You can get a client or an enterprise license with a pricing model. Both client and enterprise licenses let you connect to the SAP Server using Liquid UI for iOS.

1. [Purchasing through the App Store](#) gives you a **Client License**
2. [Purchasing through the Liquid UI Access Management Portal](#) gives you an **Enterprise License**

Getting Started with iOS

To help you choose the most suitable license type, we have created a comparison table between the purchase through the App Store and the purchase through the Liquid UI Access Management Portal.

Features	App Store	Liquid UI Access Management Portal
License	Client	Enterprise
Management of bulk licenses		*
Management of SAP server connections and configurations		*
Ability to push out lists of connections		*
Track license usage		*
